

NAV INDIA 25 YEARS AND COUNTING

25 YEARS STRONG THE JOURNEY THAT SHAPED US

25 years ago, in January 2001, we began building NAV India with a clear strategy and a long-term vision. Although we operated with limited resources and faced recurring infrastructure challenges, technology, unlock the analytical strength of Indian talent, constantly upgrade our software, and become the best fund administrator.

With stronger people processes and powerful in-house technology, we have proven what focus and perseverance can achieve.

As I look ahead, my vision for NAV India is even more ambitious. We will continue to build products in-house, scale globally while being rooted in India, and create a workplace where merit, innovation, and integrity define growth. Our focus will remain on uncompromising quality, cybersecurity, faster decisioning, and client-centric solutions.

Completing 25 years is not our destination, it is our launchpad. It reminds me how far we have come and inspires me to shape the next 25 years with even greater impact, ambition, and excellence.

CA Anil Agrawal
MD- NAV India

A Decade of Growth at NAV India

“Spending 10 years with an organization is a milestone to celebrate, and my journey at NAV India has been truly special. Every success was celebrated, and every challenge was met with strong support. From a small team to a growing organization of over 200 professionals and a significantly expanded client base, the journey has been incredible. Meaningful mentorship, a supportive culture, and the confidence shown by leadership shaped my growth. Having moved cities seeking a safe, growth-oriented workplace, NAV India has been deeply cherished, teaching me resilience, teamwork, and lasting values.”

Priyanka Mawandia
VP – Private Equity, Accounting, NAV India

“My journey at NAV reflects who I've become professionally. I joined as a Trainee Associate, and today, as Vice President – IT, my growth has been shaped by learning, resilience, and the courage to say yes to challenges. I learned that real growth is less about titles and more about mindset and problem-solving. As an individual contributor, I redesigned P&L calculations using robust .NET technology, led end-to-end Master Data Management, and introduced NAV's first PUB-SUB model, transforming application interactions. Evolving from leading one application to multiple platforms was a defining leadership milestone. NAV's trust made this journey deeply rewarding. To young professionals: even in the AI era, own your decisions, stay curious, and let problem-solving be your strength.”

Amrita Singh
VP – Commodity Systems, IT, NAV India

FOUNDATION DAY CELEBRATION

The 25th Anniversary Carnival marked a vibrant celebration of NAV India's milestone year, bringing together employees and their families in a spirit of joy and togetherness. The campus transformed into a lively carnival with engaging food, art and craft, and game stalls that showcased employee creativity and enthusiasm. Insightful reflections by CTO Ms. Sudha Gupta and CA Mr. Anil Agrawal highlighted NAV's journey, growth, and future vision. Energetic performances by three bands added to the festive atmosphere. The evening concluded with the NAV Awards Ceremony, honouring employees completing over 20 years of service, celebrated proudly alongside their families.

2025 AT A GLANCE

SPEED, TRANSPARENCY AND TECHNOLOGY THAT SCALES

NAV's 2025 independent satisfaction survey reflects the strength of its systems, processes, and technology (rated on a 1-10 scale):

8.79

Likelihood to recommend NAV

8.67

Clarity, accuracy, and completeness of reporting

8.55

Timeliness of reporting

8.34

Technology innovation and ease of use

These results highlight the organization's continued focus on automation, operational rigor, and scalable technology, driven by teams committed to building reliable and future-ready solutions.
